PROFESSIONAL SUMMARY

Almost 4 years of frontend development experience creating scalable, cross-platform solutions that ensure seamless browser compatibility, while collaborating with cross-functional teams to drive impactful, user-centered outcomes.

WORK EXPERIENCE

ServiceNow, India

11/2024 – Present

Software Engineer 2 | 11/2024 - Present

Hyderabad, India

- Developing a scalable **full-stack product from the ground up using the Seismic framework** that serves as a unified vault for all security-related products.
- Engineered over **50+ end-to-end automated test cases from scratch using Selenium**, driving a 70% reduction in manual testing effort.

Iqvia, India

08/2021 – 10/2024

Software Development Engineer 3 | 07/2023 - 10/2024

Bangalore, India

- Successfully migrated complex legacy codebase from **Vanilla JS and JSP to Angular framework**, resulting in improved code quality and performance.
- Achieved **40% reduction in load times** and **30% reduction in bug reports** after migration.
- Implemented interactive **Data visualizations using D3.js**, enhancing data insight and user engagement.
- Developed set of **reusable UI components using React**, ensuring consistent front-end standards across the organization and **reducing development time by 20%** for future projects.
- Built and optimized state management for complex user interfaces using **React hooks (e.g., useState, useEffect) and Context API**, improving performance and maintainability across projects.

Software Development Engineer 1 | 08/2021 - 07/2023

- Prioritized and **managed technical debt** items, including upgrading Angular (from **version 7 to 15**), Angular Material, Ag-Grid, and jQuery.
- Developed user facing features requiring consuming APIs, handling **large volume asynchronous data fetching**, and implementation of front-end patterns such as **lazy loading**.
- Implemented **RxJS to manage data streams** efficiently, event handling and state management.
- Resolved **100% of vulnerabilities identified in Qualys scans**, significantly enhancing application security and achieving compliance with industry standards.
- Led the implementation of unit test automation using Karma and Jasmine from scratch, driving **code coverage from 0 to a minimum of 80%**.

EDUCATION

National Institute of Technology, Calicut

06/2017 – 05/2021

Bachelor of Technology, Chemical Engineering

Calicut, Kerala

PROJECTS

ShopPro - Ecommerce | Angular, Bootstrap, Angular Material

[Source Code](#)

- Implemented efficient item listing with detail views, including dynamic product filtering, real-time price calculations, product data visualization and responsive design optimizations.
- [Live site here](#)

TECHNICAL SKILLS

Web Development: HTML, CSS, SCSS, JavaScript/TypeScript, Angular, React, Seismic, NodeJS

Testing: Jasmine Framework, Selenium | **UI Libraries:** jQuery, Angular Material | **Database:** MongoDB, SQL

CSS Framework: Bootstrap, Tailwind | **Package Managers:** Npm, Yarn | **Tools:** Jenkins, Figma
